Testimonials from Previous Participants

Thank u Syed Taha Ghayas for giving some golden tips in Excell....its really helping me here in bank specially the formulas.
Mufti Asad Gul, Shariah Officer at The Bank of Khyber, 8 November 2013.

You are most welcome to check the trainer's videos and viewers' comments on his Facebook page <http://www.facebook.com/Learn-WithSyedTahaGhayas>

Course Overview:

The participants will be given with a dashboard development challenge and will be taken hands-on through the whole exercise.

Course benefits for Professionals & Organizations:

It is expected that participants in Advanced Excel course should have a reasonable level of command on Excel's essential features. At the end of the course, the participants will get to learn the following advanced features of Excel:

1. Creating an Excel Dashboard from scratch
2. Adding user interaction and form controls using Developer Tools
3. Generating reports through Macros
4. Creating your own Custom Functions (Numbers to Text and more)
5. Using External Data (PowerPivot and Online sources)
6. Handling large data through Dynamic Labeling
7. Using Excel's built-in Statistical Data Analysis Tools
8. Automation of worksheets through Recording Macros and Editing them in VBA Environment

Who Should Attend?

This training is targeted for existing Excel users who have a mid-level command on Excel and wish to tap into advanced features and functions for increased productivity and greater capability of analyzing and sharing data.
