

HOW BLOCKCHAIN WILL TRANSFORM THE DIGITAL ECONOMY

Workshop Overview:

Technology especially related to payment systems has emerged as a key imperative for organizations as several corporate failures and disasters surfaced, out of loosing pace with the technology as well as lack of alignment between business objectives and the IT objectives. The evolving and emerging role of technology and automation in the banking/ financial services sector is becoming increasingly complex. Increasing number of Banks/DFIs/ Microfinance Banks are leveraging technology to offer innovative products, efficient services and venture into new business models, which, at the same time, gives rise to lot of risks to its stakeholders.

To effectively cater the risks of such emerging technologies, we, first, need to understand the basics/ logics of such technologies, than reviewing the viability of such technologies and finally the challenges of implementation. This workshop will help the participants to understand the core concepts/ contents of Block chain, Bit coins, FINTECHs and the benefits implementation of block chain.

18th November 2017

Falettis Hotel Lahore

23rd December-2017

Movenpick Hotel Karachi

Timings: 9:00 am to 5:30 pm
